

The Cosmic Hologram: In-formation at the Center of Creation

by Jude Currivan PhD

Inner Traditions (March 2017) ISBN 978-1-62055-660-3

WINNER 2017 SILVER NAUTILUS BOOK AWARD for science and cosmology

Reveals Scientific Evidence That Reality IS Information, Mind and Matter are Unified, and Consciousness Isn't Something We Have, It's What We and the Whole World ARE

The Cosmic Hologram: In-formation at the Center of Creation by cosmologist Jude Currivan Ph.D. transforms our understanding of the entire Universe, and crucially, at the level of our everyday lives. It describes how the latest scientific discoveries across many fields of study show that the information that upholds our technologies is exactly the same as universal in-formation that is all we call physical reality.

Exploring how our Universe is in-formed and holographically manifested, the book explains how, for the first time, quantum and relativity theories can be reconciled by considering energy-matter and space-time as complementary expressions of information, and how the cosmic hologram in-forms the true origin of species.

It demonstrates how the fractal micro in-formational patterns that guide behavior at the atomic level simultaneously guide the macro structure and lifecycles of galactic clusters in space. How the in-formational relationships that underlie earthquakes are the same as those that drive human social conflicts. How cities grow in the same in-formational ways that galaxies evolve, and how the dynamic in-formational forms that pervade ecosystems are identical to the structures of the Internet and our social behaviors.

Describing experimental evidence that information is physically real, the book explores how consciousness connects us to the many interconnected layers of universal in-formation, making us both manifestations, and co-creators, of the cosmic hologram of reality. Vitality, it reveals that we are microcosmic co-creators of the innate intelligence of our Universe that exists and evolves as a coherent entity; a finite thought in the infinite mind of the Cosmos. Aligning scientifically based evidence with universal spiritual experiences, the book serves to clarify our understanding and awareness of reality as a unified whole.

This WholeWorld-View has the power to heal our fragmented perspectives, and so radically change our collective behaviors. It invites us into the potential to transform the challenges of our global emergency into the emergence of our conscious evolution.

Dr. Currivan's brilliant synthesis incorporating consciousness as a fundamental element comprising the fabric of the Universe provides a bold and hopeful vision for the future of human civilization—and how each of us can fully participate as co-creators of the world to come. **Bruce H. Lipton, PhD, Stem cell biologist and bestselling author of *The Biology of Belief, Spontaneous Evolution (with Steve Bhaerman) and The Honeymoon Effect***

The Cosmic Hologram is a wonderfully important and very wise book. It is likely that the issues Dr. Jude Currivan addresses will determine our fate as a viable species on this particular planet. **Larry Dossey, MD Author: ONE MIND: Why Our Individual Mind Is Part of a Greater Consciousness and Why It Matters**

Jude Currivan, Ph.D., is a cosmologist, planetary healer, futurist and author. She was previously one of the most senior business women in the UK, as CFO and Executive Board Member of two major international companies. She has a Master's degree in Physics from Oxford University specializing in quantum physics and cosmology, and a Doctorate in Archaeology from the University of Reading researching ancient cosmologies. She has traveled to nearly 80 countries, worked with wisdom keepers from many traditions, and been a life-long researcher into the scientific and experiential understanding of the nature of reality. The author of 5 prior books, she is a member of the Evolutionary Leaders circle (www.evolutionaryleaders.net) and lives in Wiltshire, England.
